WIT COMMUTE ASSISTANT

By: Rainier Legolas Ang

WIT COMMUTE ASSISTANT
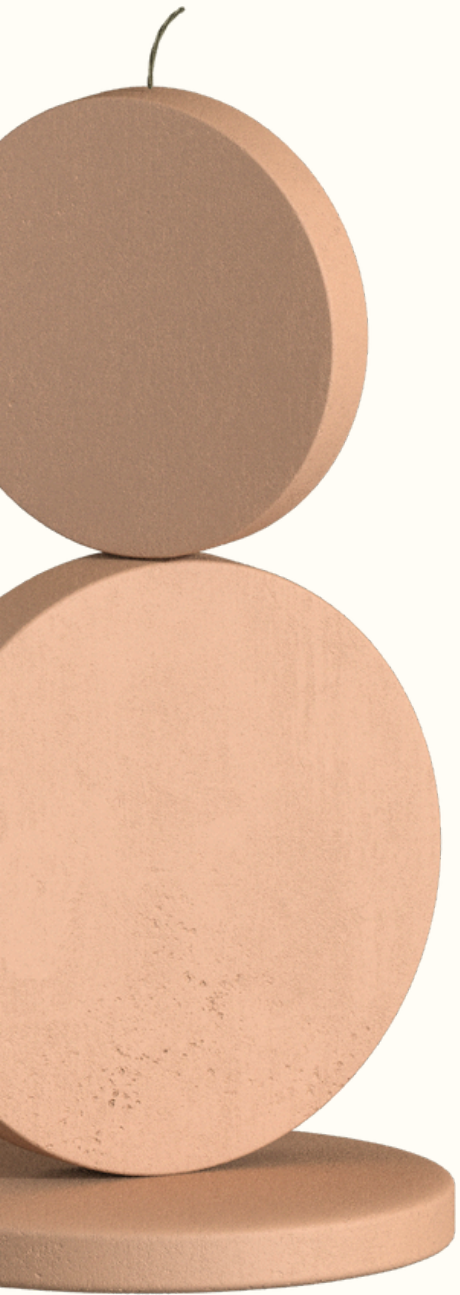

What should you know about?

Is a useful tool that allows students and staff at Western Institute of Technology to effortlessly identify jeepney routes and estimate costs from important Iloilo landmarks to WIT.
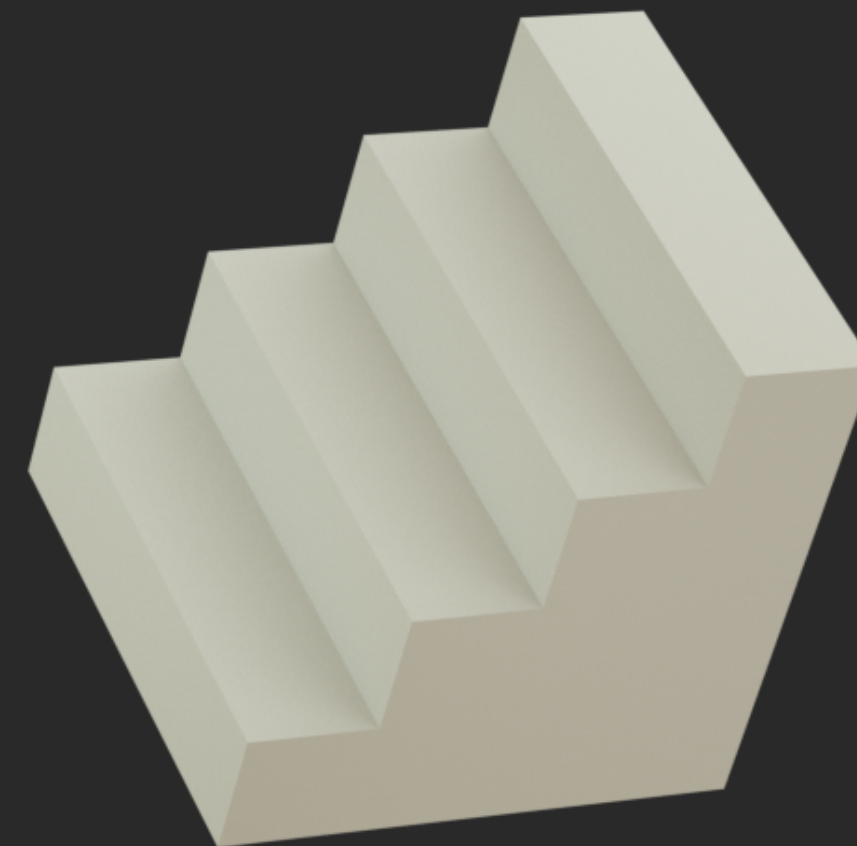

Input
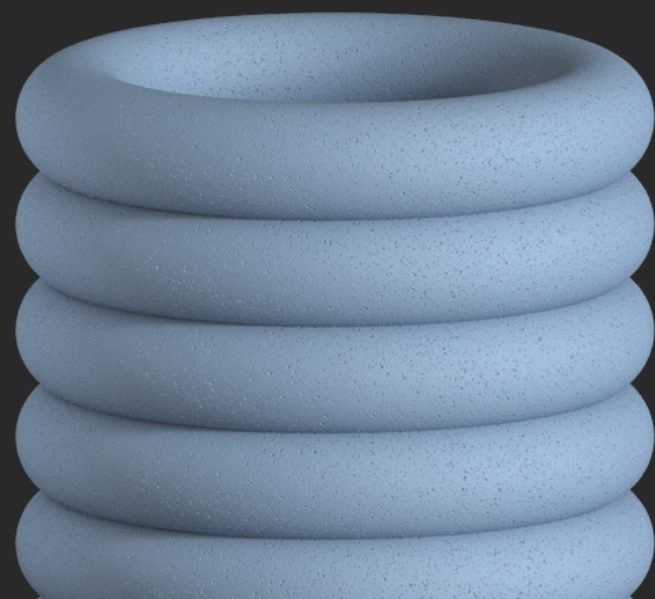

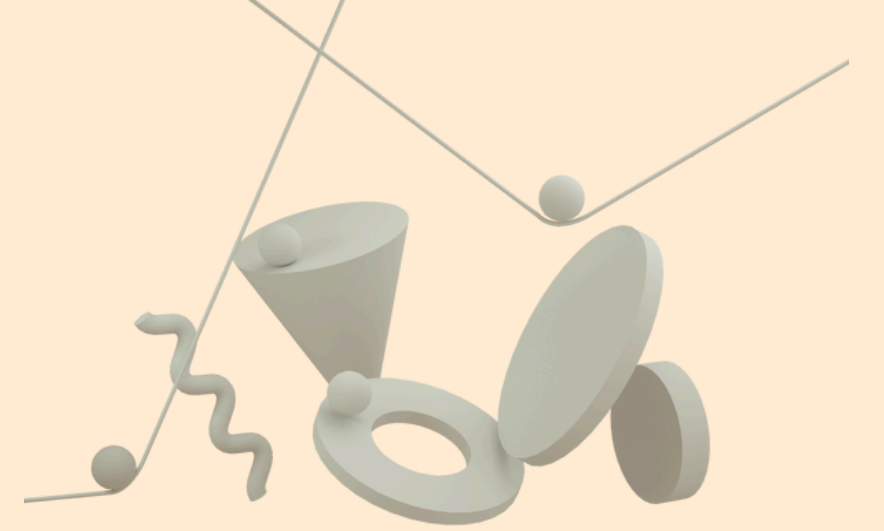

- User's current location

Output

- Step-by-step directions (jeepney routes) from user's chosen location to WIT.

- The estimated fare range for the commute.

- Option to check another location or exit the program.

Why is it useful?

1. **Helps You Save Time**
   Gives clear directions to avoid confusion and delays.

2. **Helps you budget**
   Shows fare estimates so you know what to expect.

3. **Great for newcomers**
   Ideal for students unfamiliar with local routes.

4. **Supports local commuting**
   Encourages smart use of public transport.

Flowchart

Start → Display "Welcome Screen" → Get user input (A – F)

Is Input valid?

NO → Exit

YES → Display output according to user input → Wait for user (Enter)

Thank you
